

CRYPTO PRODUCT ANNOUNCEMENT AT MONEY20/20

CheckSig Launches Embedded Crypto Services to bridge Traditional Banking and Digital Assets

Amsterdam, June 4, 2025 – **CheckSig**, the leading European Crypto Asset Service Provider, announces the launch of its **embedded crypto services** at **Money20/20**, enabling **banks, wealth managers, and fintechs** to offer crypto features natively within their platforms. This move further solidifies CheckSig's position as the **trusted partner** for financial institutions entering the crypto asset space.

*"Financial institutions are eager to offer crypto, but they need a solution that ensures **security, compliance**, and a seamless user experience," said **Michele Mandelli**, Managing Partner of CheckSig. "Our platform removes the barriers to entry, enabling banks and fintechs to quickly offer digital asset services and meet the growing demand from their clients for crypto products - **securely and with full regulatory alignment**."*

What sets Clear apart is its **Crypto-as-a-Service platform**, built from the ground up for **security, compliance**, and **speed-to-market**. With Clear's modular APIs, institutions can seamlessly embed **crypto trading, custody, staking, crypto-backed loans**, and **tax compliance** directly into their apps, offering users a **seamless experience**.

With CheckSig Clear's Embedded Crypto, institutions can deploy:

- **Regulated Crypto Trading:** Buy, sell and swap Bitcoin, Ethereum, and other assets with best execution.
- **Institutional-Grade Custody:** Patented multi-signature architecture with full asset segregation.
- **Instant Crypto-Fiat Settlement:** Built-in, compliant settlement between digital and traditional currencies.
- **Escrow Services for Crypto-Backed Lending:** Secure, on-chain collateral management for credit products.
- **Protocol Staking:** Offer clients access to staking rewards on supported blockchain networks.
- **Tax Reporting Tools:** Automated tracking for tax compliance across jurisdictions.
- **Compliance AML:** Know Your Transaction and Travel Rule to support AML operations.
- **White-Label or Co-Branded Deployments:** Offer services under your own brand or CheckSig's trusted identity.

Clear's infrastructure stands apart with two international custody patents and a security model recognized by the Bank of Italy's Fintech Hub.

CheckSig: Italian Excellence in Crypto-Assets

Founded in 2019 as a spin-off of the [Digital Gold Institute](#), Italy's leading think tank on Bitcoin, crypto-assets, and blockchain, CheckSig offers advanced solutions for both private and institutional investors. Its mission is to make crypto-asset investment simple and secure, providing services in trading, custody, staking, tax compliance, education, and consultancy. The platform also operates in a B2B2C model, offering Crypto-as-a-Service infrastructure through clear.checksig.com. CheckSig is:

- *The first company in the world to offer [public Proof-of-Reserves](#) since 2020 and the only custodian to do so.*
- *The only Italian crypto operator with [insurance coverage](#), provided by a leading European company with an AA rating from Standard & Poor's.*
- *The only Italian crypto company with [SOC1/SOC2 Type II attestations](#), achieved through ongoing audits by one of the Big Four to verify system and organizational control quality.*
- *Since 2024, the first and so far only crypto-asset service provider in Italy to act as a [tax withholding agent](#) for its clients.*
